

JUNIOR - MIDDLE BACKEND DEVELOPER

Location: VTV8 Building, Da Nang

We are seeking a talented and motivated Backend Software Engineer - Junior/Middle level to join our dynamic team. As a Junior BE, you will have the opportunity to work on exciting projects, learn from experienced developers, and contribute to the development of our software solutions. If you have a passion for software development, a strong foundation in programming, and a desire to grow your skills, we encourage you to apply.

Responsibilities:

Coding and Development:

- Collaborate with senior engineers to design, code, test, and debug backend applications.
- Develop and maintain high-quality, efficient code using best practices and coding standards.

Database Management:

- Assist in database design, data modeling, and database management.
- Write and optimize SQL queries for database operations.

API Development:

- Contribute to the development of RESTful APIs and web services.
- Integrate backend components with front-end applications for seamless data flow.

Bug Fixes and Troubleshooting:

- Identify, report, and resolve bugs and technical issues in a timely manner.
- Participate in troubleshooting and debugging efforts.

Code Reviews and Collaboration:

- Actively engage in code reviews to learn from experienced engineers and enhance code quality.
- Collaborate with cross-functional teams, including front-end developers, QA engineers, and product managers.
- Communicate effectively within the development team.

Documentation:

- Document code, technical specifications, and development processes.
- Maintain clear and up-to-date documentation.

Qualifications:

- Bachelor's degree in Computer Science, Software Engineering, or related field.
- Strong foundation in programming and computer science concepts.
- Familiarity with one or more programming languages, such as Go, Java, or JavaScript.
- Understanding of database concepts and experience with SQL.
- Basic knowledge of web development and API design.
- Eagerness to learn and adapt to new technologies and tools.
- Excellent problem-solving and analytical skills.
- Effective communication and teamwork abilities.
- Commitment to writing clean, maintainable code and following best practices.

What we'll bring to you

- Provided with high-end working equipment.
- Stable, long-term working environment.
- 18 days annual leave, working Monday – Friday.
